---

Dear Ankur

Thanks for agreeing to join the editorial board of JGR Biogeosciences..You'll be a great addition to the board with your broad set of skills in measuring and modeling fluxes of trace gases between the biosphere and atmosphere and upscaling them with models at regional scales..and your keen eye to evaluating papers

I will forward this recommendation to AGU for formal approval..Then my assistant, Brendan Tully, will contact you about logging into gems and how to deal with the assignments.

Look forward to working with you and thanks for agreeing to join the board. And feel free to contact me about specifics..

PS Brendan, Ankur's contact numbers are:
